PUBLIC MEETING

- The reconstruction of the State Route 143 / Koepfli Lane / Troxler Avenue intersection will be the topic of a public meeting.
- The meeting will be held on Monday evening (4-7pm), February 24th, at City Hall.
- This proposed project will add a right turn lane at the stop light on Route 143 onto Troxler Avenue, and a right turn lane on Troxler Avenue onto north-bound Route 143 at the same location.

Iberg Road Update

Work has continued on the Iberg Road extension project this winter. Photos below show that recently the contractor has been using a crane and diesel powered hammer to drive 76' long H piles into the ground. There are twenty piles, ten on each abutment. The piles, along with the drilled shafts, will completely support the new bridge over the railroad tracks. Weather permitting the pile driving will be completed this week.

The pictures below show the reinforcing bars that will be used in the drilled shaft supports for the bridge over the railroad tracks. The bars have been assembled into cages at the construction site. Each cage is 4' in diameter and 55' long. The cages will be buried and filled with concrete to work in conjunction with the pilings to support the bridge. The contractor plans on beginning this work next week and hopes to finish the first week in March.
