Admin. Assistant

Rock On

In the last couple of weeks the Street and Alley division has taken delivery of 2,000 tons of rock. They have been working to expand the storage area around the salt storage facility on Highland Road. The area had to be excavated, pavement stabilization fabric was installed, and finally the new rock surface has been put in place.

The department has outgrown their current storage area by their shop across the road from the current location. The additional space is needed for the everyday operating supplies of the department, such as culverts. In addition the space will be utilized to store the city-owned dumpsters. The final plan for the storage lot will include fencing in the area.

The city-owned dumpsters are currently stored on the property that was formerly the First Student school bus lot on Cedar Street. The city recently sold this property to Aircraft Plywood Manufacturing, Inc. for their new location. Their former location on 13th Street was destroyed in a fire last year.

It took around 100
truck loads to deliver
the 2,000 tons of rock
to the site for this
project.
