## Project Update

Work on the Troxler Avenue Pavement Restoration Phase II project began on Monday, October 29th.

The contractor, Interstate Improvement of Faribault, MN has sawed 2300 individual slots in the roadway. The slots were chipped out, and sand blasted to be prepared for the restoration of the roadway.

Restoration involved installing over 2300 individual 18" long 1.5" diameter smooth dowel bars. After the bars were installed the slots were filled with rapid setting, high strength, cement.

Diamond grinding will smooth the surface and level out cement. The contractor anticipates completing the diamond grinding process this week, leaving joint sealing and final striping yet to be completed to finish the project. The entire project is expected to be completed by the end of next week.

\*\*\*\*\*

The Water and Sewer Division continues with hydrant flushing. At this time everything south of Broadway has been completed.

This week the Street and Alley Division assisted the Water Reclamation Facility with sludge hauling for land application.

The Dolphin Drive culvert replacement project, originally scheduled for this past summer, now has a start date of November 26th.
