

Storm Related Debris Removal

Due to high winds, the Street and Alley Division will be collecting storm related debris. Any debris that can be bagged, bundled, or placed in a can with a **X** for pickup by the trash haulers should be handled in that way. Only very large limbs or amounts will be collected by the Street Department.

All debris for pickup must be moved to curbside or to the alley. Department personnel will not remove debris from private property. Crews will not patrol the streets and alleys for debris piles. In order to have your debris removed please call the Public Works Department 654-6823 and have a work order entered for the pickup.

Pickup will continue through Monday, May 23.
