In an effort to protect as many individuals as possible, including the leaders of our communities statewide, Governor J.B. Pritzker has issued a number of directives, one of which was to suspend the provisions of the Illinois Open Meetings Act (5 ILCS 120), requiring or relating to in-person attendance by members of a public body. Specifically, (1) the requirement in 5 ILCS 120/2.01 that "members of a public body must be physically present;" and (2) the conditions in 5 ILCS 120/7 limiting when remote participation is permitted, are suspended. Public bodies are encouraged to postpone consideration of public business where possible. When a meeting is necessary, public bodies are encouraged to provide video, audio, and/or telephonic access to their meetings to ensure members of the public may monitor the meeting, and to update their websites and social media feeds to keep the public fully apprised of any modifications to their meeting schedules or the format of their meetings due to COVID-19, as well as their activities relating to COVID-19.

RE: 516 9th Street

I recommend that City Council declare 516 9th Street as surplus.

The former property owner signed a quit claim deed to transfer the property to the City of Highland. After the quit claim deed was recorded with the Madison County Recorder's office, the City of Highland published a Notice of Municipal Letting for the demolition of the property's structures. The bid has since been awarded and the structures have been properly demolished.

An appraisal for the vacant lot has been received. The City of Highland does not have a use for this lot and, therefore, intends to declare as surplus and sell the lot.

CERTIFICATIONS AND LIMITING CONDITIONS

This report form is designed to report an appraisal of a parcel of land which may have some minor improvements but is not considered to be an "improved site". All improvements are considered to be of relatively minor value impact on the overall value of the site. This report is not designed to report on an "improved site" where significant value is derived from the improvements. This appraisal report form many be used for single family, multi-family sites and may be included within a PUD development. This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions and certifications. Modifications, additions, or deletions to the intended use, intended user, definitions of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material altercations to this appraisal report, such as those required by law or those related to the appraiser's continuing educations or membership in an appraisal organizations are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the subject site and any limited improvements, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research verify and analyze date from reliable public and/or private sources, and (5) report his or her analysis, opinions and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this report is the lender/client identified within the appraisal report.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and passing of title from the seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what they consider their own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in United States dollars or in terms of financial arrangements comparable thereto and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale. (Source OCC, OTS, FRS, & FDIC joint regulations published June 7, 1994)

*Adjustments to the comparables must be made for special or creative concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition of law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concessions but the dollar amount of any adjustment should approximate the market's reaction to the financing concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect the subject property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the subject property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties express or implied. The appraiser will not be responsible for any such conditions that do exist or for the engineering or testing that might be required to discover whether such conditions do exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal must not be considered as an environmental assessment of the property.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a complete visual inspection of the subject site and any limited improvements. I have reported the information in factual and specific terms. I identified and reported deficiencies of the subject site that could affect the utility of the site and its usefulness as a building lot(s).
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Practice that were adopted and promulgated by the Appraisal Standards Board of the Appraisal Foundation and that were in place at the time this appraisal report was prepared.

ANALYSIS OF SALES

Each of the sales were arms' length transfers of the fee simple interest in the property and therefore, no adjustments were considered necessary for interest appraised or conditions of sale. Each of the sales were sold for cash or cash equivalency and therefore, no adjustment was made for financing. The sales occurred between March 2016 and April 2018 and no adjustments for time were warranted. The adjustments for physical differences between the subject and the comparables are discussed in the following paragraphs:

<u>Location</u>: The subject and all of the comparable sales are located within the municipal limits of Highland, Illinois. However, the subject is located within an inferior area of Highland in comparison to all of the comparable sales. Therefore, downward adjustments were applied to all of the comparable sales.

<u>Size:</u> The subject property includes a total land area of 7,000 square feet. All of the comparable sales have larger site sizes which would allow for larger development. Therefore, downward adjustments were applied to all of the comparable sales for their superior size.

<u>Access/Visibility:</u> The subject is located on a secondary roadway for the subject neighborhood. All of the comparable sales are located on superior roadways with higher average daily traffic counts and downward adjustments were required.

<u>Zoning:</u> The subject is located in the "C-2" Central Business District. All of the comparable sales have similar commercial zoning and no adjustments were considered necessary for this factor.

After the adjustments, the comparable sales ranged from \$3.08 per square foot to \$3.90 per square foot with an average of \$3.42 per square foot and a median of \$3.29 per square foot. Therefore, we have utilized a rounded unit value of \$3.25 per square foot. This unit value applied to the subject property is as follows:

3.25 x 7,000 square feet = 22,750

Rounded to: \$22,500
